Electric Usage Summary

This month your average daily electric use was **43.0 kWh**

This month you used **16.2% more** than at the same time last year

News For You

Global spikes in the price of natural gas, which is often used to generate electricity, are driving the cost of energy to be higher across the country. Cost increases combined with using more energy to keep cool in the summer, means your bill will be higher than normal. Take advantage of our Cooling Calculator to see how small adjustments in your thermostat can make a big impact in lowering your electric bill at Eversource.com/cooling-calc.

Remit Payment To: Eversource, PO Box 56002, Boston, MA 02205-6002

*The Combined Public Benefits Charge represents a combination of three charges formerly known as: Conservation and Load Mgmt Charge, Renewable Energy Investment Charge, and Systems Benefits Charge. This charge also includes the Conservation Adjustment Mechanism approved by the Public Utilities Regulatory Authority in Docket No. 13-11-14.
 **Effective January 1, 2007, the Generation Services Charge (GSC) and the Bypassable Federally Mandated Congestion Charge (BFMCC) have been combined into the "GSC Charge" listed in the Supplier Services section of your bill. The GSC reflects all of the cost of procuring energy from Eversource wholesale suppliers. The BFMCC portion of this line item is -\$0.0014 / kWh. If you multiply this BFMCC rate by the number of kWhs on your bill, you can calculate the dollar amount associated with the BFMCC.
 ***Electric System Improvements: Recovers company investments that protect, strengthen or modernize the electric grid.
